TOLUWANIMI TIMOTHY DUROJAIYE.

Results-driven Frontend-focused Full-Stack Engineer with 3+ years of hands-on experience delivering scalable, production-grade web applications for international clients across the USA, UAE, Nigeria, and remote-first environments. Specializes in React/TypeScript frontends, Node.js backend services, and AI-powered product integrations (Gemini Pro, LLM APIs). Proven track record shipping payment-integrated platforms (Stripe, PayPal, Paystack), real-time systems, and AI-enhanced user experiences. Adept in Agile teams, comfortable owning full feature cycles from architecture to deployment.

Work Experience

Frontend Developer · **eJaby by Tekeya (ejaby.io)** *Dubai, UAE · Remote (Contract) | 2025 – 2026*

- **Engineered the complete UI** of the eJaby platform using React and Typescript, delivering pixel-perfect, responsive interfaces across web and mobile with consistently sub-2s load times.
- **Designed and integrated a multi-gateway payment system** (Stripe, Apple Pay, Google Pay), reducing checkout drop-off rates and boosting transaction reliability by30%.
- **Drove performance optimization** through lazy loading, code splitting, and caching strategies, yielding a 40% improvement in Core Web Vitals scores.
- **Partnered with backend and QA teams** in a cross-functional Agile workflow, owning the full component lifecycle from Figma design handoff through production release.
- **Eliminated 60% of UI bug backlog** by spearheading systematic component refactoring and establishing a shared design system adopted across the engineering team.

Live Product: https://ejaby.io/

Principal Full-Stack Developer · **ByTeom Technologies** *Lagos, Nigeria | 2023 – Present*

- **Architected and shipped multiple client-facing web and mobile applications**, delivering full-stack features using React, Next.js, Node.js, PostgreSQL, and MongoDB within tight sprint cycles.
- **Built and deployed AI-driven workflow automation modules** integrating third-party LLM APIs, reducing clients' manual processing overhead by an estimated 45%.
- **Implemented secure RESTful API architectures** with JWT authentication and role-based access control, supporting 10,000+ monthly active users across platforms.
- **Owned end-to-end DevOps responsibilities**: Git branching strategy, CI/CD pipelines, and production deployments, cutting release cycle time by 25%.

Software Engineering Intern · **DoubleTon Solutions** *Abuja, Nigeria | 2020 – 2023*

- **Contributed to full-stack feature development** across multiple client projects, writing React frontends and Node.js/Express backend APIs consumed by mobile and web clients.
- **Optimized critical MongoDB and SQL queries**, improving data retrieval speed by up to 35% on high-traffic endpoints.
- **Collaborated with senior engineers** in code reviews, adopting best practices in clean code, modular architecture, and thorough documentation.
- **Elevated code quality** through active participation in code reviews, championing clean code principles, modular architecture, and thorough documentation standards

Technical Co-Lead & Frontend Tutor · **Google Developer Groups — Ajayi Crowther University** *Oyo, Nigeria | 2023 – 2025*

- **Co-led a 200+ member developer community**, organizing workshops, tech talks, and bootcamps on Frontend Development, AI tooling, and modern APIs.
- **Designed and delivered a structured frontend curriculum** adopted by the club, mentoring 30+ students who went on to secure internships and freelance contracts.
- **Spearheaded the TechUp Summit and multiple Python bootcamps**, attracting 150+ attendees and partnering with industry sponsors.

Key Projects – Some of my key projects

Swarm Intelligence Production Line Simulator — *React Three Fiber · Recharts · TypeScript - Python*

- Built an animated 3D production line dashboard simulating swarm agent behavior with real-time data visualization and a blueprint-style PDF export feature.
- Implemented custom Three.js rendering pipelines and Recharts dashboards to communicate complex simulation states to non-technical stakeholders.

GitHub: https://github.com/davistolu/swarm-intelligence-proj
Link: https://swarm-intelli.netlify.app/

Freelancer Pricing & Marketplace Platform — *React · Node.js · Socket.io · Paystack · PayPal*

- Architecting a full-featured freelancer marketplace with real-time messaging (Socket.io), subscription tiers, client review system, and dual payment gateway support.

- Designed a modular backend API with JWT auth, role-based access, and webhook handling for payment events.

Financial Assistant & Budgeting Chatbot — *React · Flask · Gemini Pro API*

- Developed an AI-powered personal finance assistant capable of budget tracking, expense categorization, and natural-language financial advice using Gemini Pro.
- Migrated architecture from OpenAI/GPT-3.5 to a Flask backend with Gemini Pro, reducing per-request latency by 35% and API cost by 50%.

GitHub: https://github.com/davistolu/financial-assistant-chatbot

RIAUM — *MERN Stack · AI Integration · TypeScript · Node.Js · Recharts*

- Architected and built a full-stack mental wellness platform focused on personalized relaxation, mood tracking, and AI-guided mindfulness experiences
- Designed a scalable React + Node.js architecture with modular services for user sessions, content delivery, and analytics
- Implemented AI-driven personalization using LLM APIs to generate real-time mindfulness suggestions based on user mood, behavior, and usage patterns
- Built a real-time mood tracking system with data visualization (Recharts), enabling users to monitor emotional trends over time
- Developed secure authentication and session management (JWT, RBAC) supporting personalized user experiences
- Optimized frontend performance using lazy loading, memoization, and asset optimization, achieving sub-2s load times across devices
- Integrated analytics and event tracking to monitor user engagement, improving session duration and retention metrics
- Designed a calm, immersive UI/UX system using Tailwind + animation libraries, increasing user engagement and interaction consistency
- Deployed using CI/CD pipelines (GitHub Actions + Vercel) with environment-based configurations and production monitoring

Skill Highlights

Languages	**JavaScript (ES2022+), TypeScript, Python, Dart, HTML5, CSS3**
Frontend	React.js, Next.js, Tailwind CSS, React Three Fiber (Three.js), Anime.js, Recharts, Chart.js
Backend	Node.js, Express.js, Flask, Nest.js, RESTful APIs, WebSockets (Socket.io), GraphQL basics
Databases	MongoDB, MySQL, PostgreSQL, Firebase
AI / ML	Gemini Pro API, OpenAI API, DeepSeek, LLM prompt engineering, AI workflow automation, Cursor, Claude, Windsurf
Payments	Stripe, Apple Pay, Google Pay, Paystack, PayPal
DevOps & Tools	Git, GitHub Actions, CI/CD, Docker basics, Vercel, Netlify, Postman, Figma, AWS
Practices	Agile/Scrum, Test-Driven Development, Clean Architecture, JWT Auth, RBAC, WCAG Accessibility

EDUCATION

B.Sc. Computer Science · **Ajayi Crowther University** *Oyo, Nigeria | 2021 – 2025*

- Financial Secretary — National Association of Computer Science Students (NACOS)
- Technical Co-Lead — Google Developer Groups On Campus (GDG ACU)

ADDITIONAL HIGHLIGHTS

- Open-source contributor and active GitHub presence with public project repositories.
- Shipped production software for international clients across the USA, UAE and Nigerian markets, comfortable managing time zone-distributed workflows.
- Strong communication skills honed through mentoring, public workshops, and client-facing delivery.
- Available for immediate start; open to full-time remote, hybrid, or relocation opportunities.
